PROJECT

Construction & Mounting

HOUSING

Sides are 1/2" x 6 to 16 inches thick. Acoustic sound reduction linear panels and are supplied in nominal lengths of 4 ft. 8 ft.. Side panels do not need to be removed during installation or for maintenance. Fixtures may be continuously rowed (contact factory for details). Internal components are constructed from min. 20 gauge die-formed steel. Custom sizes are available.

REFLECTOR

There is no reflector in this fixture.

FINISH

Please use color chart below to select your acoustic sound reducing panels.

OPTICS

There are no optics in this fixture.

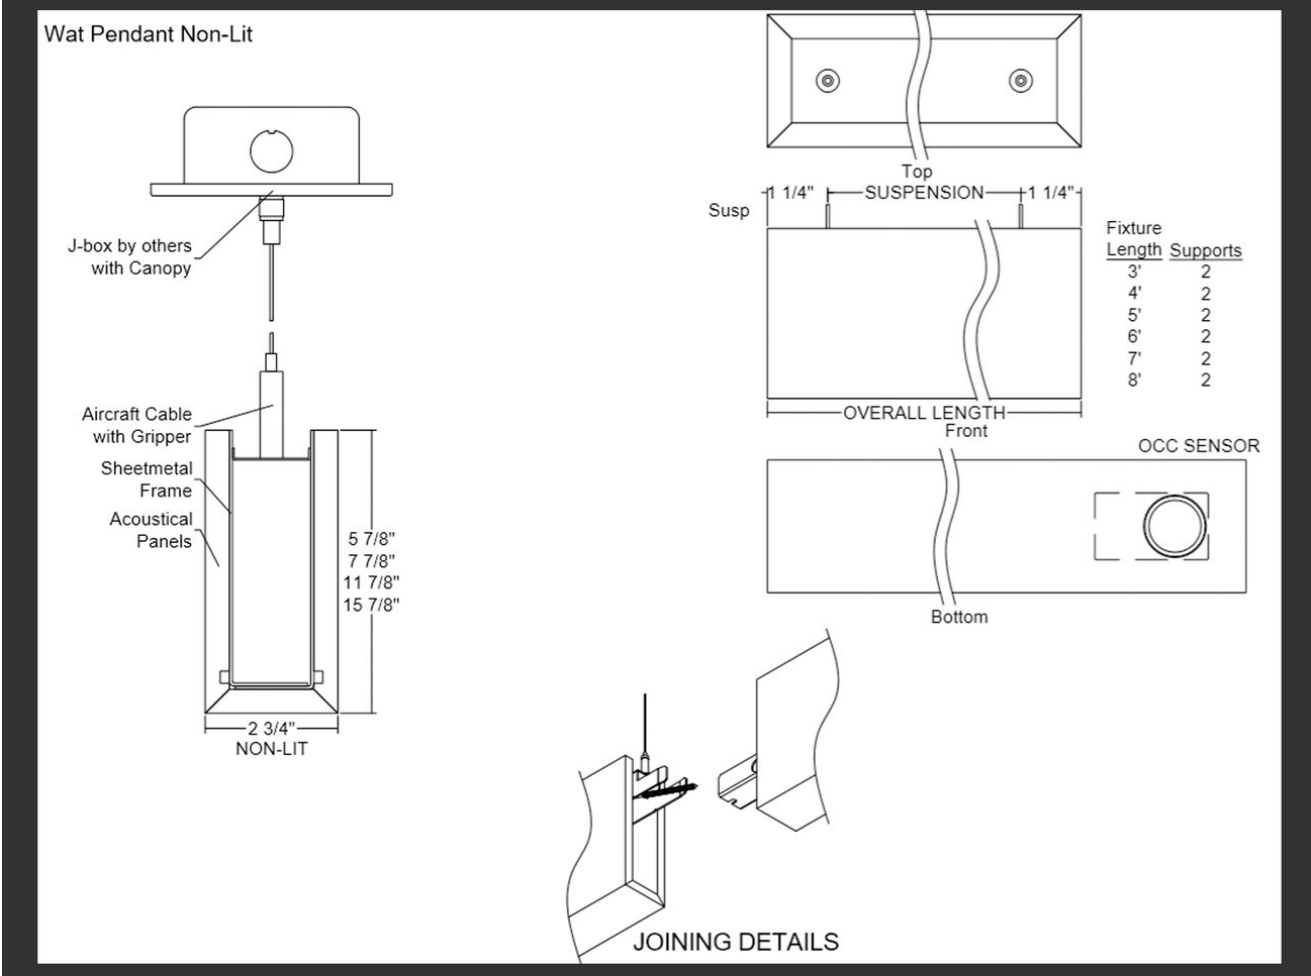

MOUNTING

Cable mounting with various size canopies and power feeds. If not selected in options, canopy color and cord will be white. Cable uses gripper style locking for field adjustments. Canopy mounts to standard J-box. Can also be stem mounted. See options for more information.
